NOW ON SALE. IMPERIAL QUARTO. DICTIONARY WITH THE PUNTI AND MANDARIN

PRONUNCIATION. An Angle-Chinese Dictionary, published at Daily Press Office. Hongkong. For comprehensiveness and practical service this Work stands unrivalled. All the new

words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extense. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size * There will be no Lannel on Monday and of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins In and vacant spaces which have heretofore charac-To illustrate the vast scope of the work the

following facts are submitted for consideration:-Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medburst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese charac-TIES, Vel. 17. SCOTLAND, IRELAND, ters. Again, despite all the grammars and other elementary works us yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary hitherto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in Chins, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested

in China it cannot but be invaluable occasion-It comprises upwards of two thousand large NGLO-CHINESE 'CALENDAR, quarto pages.
